## ***We Live in a Male-Female World***

By Jim Lamberth, Highway church of Christ, Floresville, TX

I have been telling this story for years, and now I would like to share it with others. When you dig a small hole and put a seed into it and then cover it up so they have some privacy, they together will reproduce. This is a natural thing many have used to teach their children early in life. Often the soil is in a small paper cup or some other container. Some seeds are naturally sown on top of the soil. These will sprout and produce roots that go into the soil. These are male-female situations. The soil is female; the seed is male. When you place a light bulb into a socket and mate them according to the design of each, they will work together to do the job they were designed to do. That again is a male-female situation. All of us have used nuts and bolts or screws to hold things together. All of these are male-female situations. Two bolts cannot be put together without a female connection. Don't jump to the wrong conclusion; I am not indorsing polygamy.

I have known of a couple of nuts that would get together and they were real comics and entertaining, but when it goes past that, unless one is male and the other is female, this is against nature.

I know we can all think of many other things in this world that express the male-female natural concept, but I think these should show what I am trying to prove.

### **Rom 1:26-27**

26 For this reason God gave them up to vile passions. For even their women exchanged the natural use for what is against nature. 27 Likewise also the men, leaving the natural use of the woman, burned in their lust for one another, men with men committing what is shameful, and receiving in themselves the penalty of their error which was due. NKJV

God created a natural world for us to live in. Nature is all around us, and He made it for us to live in and serve Him. He expects us to love each other, but He prescribed a natural way for that to be done. If some man decides to love another man's wife in an unnatural way according to God, he may just get himself shot dead.

In the animal world we see natural things happening. Some, especially water fowl, mate for life. This is always male and female. The males usually get along and work together, but don't mess with my female or you will have a fight on your wings.

We see one female cow riding another female cow as a bull would. This occurs when one of them is "in season" but the final job is left up to the bull. We see the young calves playing together and jumping up onto each other in this manner, but when they grow up, they learn what is natural and what is against nature. When a rancher observes this, he recognizes a cow is in season.

We humans need to look at the world around us and learn what is natural and what is unnatural according to the One who put this world together in the first place.

### **Gen 1:27**

...in the image of God He created him; male and female He created them. NKJV

### **Gen 2:24**

24 Therefore a man shall leave his father and mother and be joined to his wife, and they shall become one flesh. NKJV
